

The 360° revolution in cow comfort

DeLaval swinging cow brush SCB360

We set ourselves a challenge
- to make the number one
cow brush even better. Now
you and your cows can benefit
from our improvements.

Essential cow comfort

DeLaval pioneered and patented the swinging cow brush: first to invent it, first in cow comfort. The unique, cow-friendly design lets it swing freely onto the cow's back or head, over and along her sides. With DeLaval SCB360, every cow in your herd can groom herself all over.

Good, better, best

This third generation of our swinging cow brush has a sleek blue curved frame. We designed the robust new rounded frame to swing and rotate the brush safely – for grooming cows 24 hours a day, 365 days a year. Two pivot points, one at either end of the curved arm, improve the grooming angles for smoother, even more cow-friendly movement.

Your DeLaval dealer

Your cow comfort – your profit

With DeLaval swinging cow brush SCB360 you can be sure that your cows are grooming themselves with bristles of the right length and firmness to stimulate blood circulation. This improves cow health and performance. The latest research shows a significant reduction in clinical mastitis and up to one litre more milk per cow every day from cows using DeLaval SCB. (Ynte H. Schukken and G. Douglas Young.)

Safety and performance

The unique design of DeLaval swinging cow brush SCB360 has built-in safety. It rotates at a safe cow-friendly speed and will immediately stop if there is resistance. DeLaval SCB360 has sensitive overload protection against overheating and a significantly lower working temperature than the previous model. It also meets the protective criteria of IP65.

Saves energy

The energy-saving automatic on/off control starts the brush rotating on demand and stops it within 10 seconds after use. The new design is energy efficient using approximately a third less power than the previous model.

Improves cow traffic – and comfort

Minimal installation space is needed for DeLaval SCB360 – but leave room for the cow queue! As the brush is so popular, it helps cow traffic flow if it is installed in the right place. It prevents cows from hurting themselves by scratching on any available surface. One brush can efficiently groom up to 60 cows, keeping them cleaner, healthier and more comfortable. This brush operates more quietly than the previous model, for even calmer, less stressed cows.

Easy to install and maintain

DeLaval SCB360 comes pre-mounted so it is easy to install and may be mounted on a wall or post. The brush cylinder is easily removed for replacement or thorough cleaning.

360° benefits for cow comfort

- Swinging cow brush grooms cows all over
- Essential for cow comfort
- Improves cow health and welfare

- Improves herd performance
- Easy to maintain and keep clean
- Low energy consumption for high cow comfort

DeLaval swinging cow brush SCB360 – your solution, every day.
